Job Description: Full Stack Developer

Responsibilities:

- Develop front-end website architecture using React.js or Angular.

- Design user interactions on web pages.

- Develop back-end applications using Node.js/.NET/Java.

- Create servers and databases for functionality.

- Ensure cross-platform optimization for mobile phones.

- Ensure responsiveness of applications.

- Work alongside graphic designers for web design features.

- See through a project from conception to finished product.

- Design and develop APIs.

- Meet both technical and consumer needs.

Requirements:

- Degree in Computer Science or related field.

- Strong organizational and project management skills.

- Proficiency with fundamental front-end languages such as HTML, CSS, and JavaScript.

- Familiarity with JavaScript frameworks such as React or Angular.

- Proficiency with server-side languages such as Python, Ruby, Java, PHP, or .NET.

- Familiarity with database technology such as MySQL, Oracle, and MongoDB.

- Excellent verbal communication skills.

- Good problem-solving skills.

- Attention to detail.
